ABOUT ME

After graduating with a Master's degree in Civil Engineering (ULg, Belgium) and an MS in Project Management (USF, USA), I continued my learning journey by attending a coding bootcamp. I have since gained valuable experience as a Full Stack Engineer, working on web and mobile applications development, and leading projects in agile environments. My roles have allowed me to contribute to both frontend and backend projects using technologies like React, Node.js, and Next.js. I'm constantly seeking new challenges and learning opportunities.
